

CASE STUDY

How Barczyk Spine & Joint Reduced Downtime Across Six Chiropractic Locations

Barczyk Spine & Joint needed reliable IT across six clinics and gained smoother operations with proactive support.

CLIENT: Barczyk Spine & Joint

INDUSTRY: Chiropractic Care

LOCATION: Clinton Township, MI

SERVICES: Managed IT Services

Executive Summary

Barczyk Spine & Joint needed dependable IT management across six chiropractic office locations, where delays or outages could disrupt patient-facing operations. InfoTECH Solutions delivered proactive managed IT services, kept infrastructure current and optimized, and responded quickly when issues arose. The result was reduced downtime, smoother operations across locations, and a trusted long-term technology partner.

Challenges

- Supporting six chiropractic offices strained consistency, making dependable IT coverage essential across every location.
- IT issues had to be resolved quickly to prevent downtime from disrupting patient scheduling and daily operations.
- The practice needed infrastructure kept current and aligned to the demands of a multi-location healthcare environment.
- Leaders required an IT partner that could respond with urgency while maintaining a high standard of service.
- Without proactive oversight, technology gaps could slow staff and weaken seamless operations between offices.

InfoTECH's Approach

Key Actions

- InfoTECH Solutions centrally managed IT services for all six office locations to create consistent support coverage.
- The team applied a proactive service approach to keep core systems current and tuned to the practice's needs.
- Support requests were handled with urgency, delivering swift and reliable resolutions when issues affected operations.
- InfoTECH aligned ongoing infrastructure oversight with the practice's evolving workflows and multi-site demands.
- A consistently high service standard helped build trust and reinforce a productive working relationship over time.

Solutions

- A centralized managed services model gave the practice one accountable partner for technology across all locations.
- Proactive infrastructure management helped keep systems current, stable, and better aligned to operational demands.
- Responsive support processes reduced disruption by addressing IT needs quickly and reliably.
- Ongoing optimization improved how the environment supported the specific workflows of a multi-site practice.
- Consistent cross-location service delivery strengthened continuity for staff working across six offices.

Results

- The practice credits InfoTECH Solutions with helping minimize downtime across all six chiropractic locations.
- Faster, reliable support helped maintain seamless business operations and reduce day-to-day disruption.
- A more current, better-optimized IT environment supported stronger operational efficiency across the practice.
- Consistent service quality built a positive, productive relationship with an IT partner the team relies on.
- InfoTECH Solutions became an indispensable partner in managing the organization's ongoing IT needs.

Stabilize IT Across Every Location

If your multi-site practice depends on reliable technology, InfoTECH Solutions can help reduce disruption and improve continuity.
